Two parts that are remix of two distinct designs to fit a "chinese" mellow fly adxl345 to your V6 nozzle and prusa bed.

I personally re-designed them for an "aliexpress" mellow fly pcb and for my prusa mk3 (but it should work for any V6 nozzle and prusa-like beds).

For the nozzle mount:

- Print it on the flat face.
- You will need:
 - 2x M3x16 screws
 - 1x M3x10 screw
 - 3x M3 nuts.

For the bed mount:

- Print the paint part on its side. No supports required.
- You will need:
 - 4x M3x10 screws
 - 4x M3 nuts.
- When installing the rectangular part inside the main part, you have to place with the little side-tabs on the bottom and click inside the main part to secure it. Just push it firmly and it will stay in place.
